

United Nations Convention to Combat Desertification  
Performance Review and Assessment of Implementation System  
Fifth reporting cycle, 2014-2015 leg

# Report from Republic of Moldova as affected country Party

July 28, 2014

# Contents

## I. Performance indicators

### A. Operational objective 1: Advocacy, awareness raising and education

Indicator CONS-0-1

Indicator CONS-0-3

Indicator CONS-0-4

### B. Operational objective 2: Policy framework

Indicator CONS-0-5

Indicator CONS-0-7

### C. Operational objective 3: Science, technology and knowledge

Indicator CONS-0-8

Indicator CONS-0-10

### D. Operational objective 4: Capacity-building

Indicator CONS-0-13

### E. Operational objective 5: Financing and technology transfer

Indicator CONS-0-14

Indicator CONS-0-16

Indicator CONS-0-18

## II. Financial flows

Unified Financial Annex

## III. Additional information

## IV. Submission

## Operational objective 1: Advocacy, awareness raising and education

## CONS-O-1

Number and size of information events organized on the subject of desertification, land degradation and drought (DLDD) and/or DLDD synergies with climate change and biodiversity, and audience reached by media addressing DLDD and DLDD synergies

## Global target

Percentage of population informed about DLDD and/or DLDD synergies with climate change and biodiversity

30 %

2018

## National contribution to the global target

Percentage of national population informed about DLDD and/or DLDD synergies with climate change and biodiversity

8

2011

2013

2015

2017

2019

## Voluntary national target

Percentage of national population informed about DLDD and/or DLDD synergies with climate change and biodiversity

%

Year

Which national target your country has established to measure progress in achieving the priorities established in the national action programme, if different from the target suggested above?

There is no any specific quantitative target. However in the National Climate Strategy (2011) one of main objectives calls for building the capacities and improving the awareness and dissemination of disaster and climate risk information and provides an indication of the organization responsible, time-frame, and expected costs associated with the objectives and measures.

## Information events

Year	Number of events	Total estimated participants
2008		
2009		
2010		
2011

## Operational objective 1: Advocacy, awareness raising and education

Qualitative  
assessment

Does your country have a national communication strategy addressing DLDD and/or DLDD synergies with climate change and biodiversity in place?

Yes No 

Provide any complementary information as needed (e.g., regarding the implementation of the Comprehensive Communication Strategy, activities relating to the United Nations Decade for Deserts and the Fight Against Desertification, etc.):

To enhance and mobilize resources to the environmental protection a project on the synergism of the three UN Conventions was carried out (2005). The National Climate Strategy (2011) as one of the main objectives is to improve the management and the dissemination of disaster and climate risk information and provides an indication of the organization responsible, time-frame, and expected costs associated with the objectives and measures.

Operational objective 1: Advocacy, awareness raising and education

**CONS-O-3**

Number of civil society organizations (CSOs) and science and technology institutions (STIs) participating in the Convention processes

**Global target**

A steady growth in the participation of CSOs and STIs in the Convention processes is recorded along the implementation period of The Strategy.

National contribution to global target: number of CSOs and STIs involved in DLDD-related programmes/projects

Year	Number of civil society organizations	Number of science and technology institutions
2008		
2009		
2010		
2011		
2012	6	7
2013	6	7
2014		
2015

2017		
2018		

Sources of information: name of the CSOs and STIs

NGOs: BIOS, BIOTICA, EcoTiras, Ecological Movement, Eco-logistica, Cutezatorul
STIs: Institute of Pedology, Agrochemistry and Soil Protection „Nicolae Dimo”
Institute of Ecology and Geography
Research Institute of Field Crops "Selectia"
State Agricultural University
Moldavian State University
Comrat State University

**Voluntary national target**

Percent increase in the number of CSOs and STIs participating in the Convention process at national level, per biennium % 20

Which national target your country has established to measure progress in achieving the priorities established in the national action programme, if different from the target suggested above?

--

## Operational objective 1: Advocacy, awareness raising and education

Qualitative  
assessment

Is your country undertaking initiatives to increase the participation of CSOs and STIs in DLDD-related programmes and projects?

Yes No 

Provide a short description of actions taken at the national level to promote participation by CSOs and STIs in the Convention processes.

Carrying out state environmental policy and strategies, the Government is working closely with civil and scientific society, efficiency of which in recent years has increased significantly. Environmental associations have annual financial resources from the National Environmental Fund for monitoring the state of the environment, public information on the quality and state of the environment, education and environmental education.

During reporting period in the framework National preparation to the Conference on Sustainable Development "Rio+20" CSOs and STIs were involved in developing of SLM related issue reports of the National Report for United Nations Conference on Sustainable Development 2012 "Rio+20". A number of CSOs and STIs were co-organizer of the Public Hearing of the draft National Report of the Republic of Moldova for Rio+20. The purpose of public consultation was to consider the conclusions and recommendations on priority actions related to the promotion and implementation of sustainable development principles in all sectors of the national economy included in the draft National Report of the Republic of Moldova for the Conference on Sustainable Development "Rio+20" "Rio+20".

However, despite of the undertaken actions, in general existing legal environment does not foster the engagement of CSOs and variations of the CSOs initiatives depend on volume of funding.

## Operational objective 1: Advocacy, awareness raising and education

## CONS-O-4

Number and type of DLDD-related initiatives of civil society organizations (CSOs) and science and technology institutions (STIs) in the field of education

## Global target

A steady growth in the number of DLDD-related education initiatives undertaken by CSOs and STIs is recorded along the implementation period of The Strategy

National contribution to the global target: number of DLDD-related initiatives implemented by CSOs and STIs in the field of education

Year	Number of CSOs initiatives	Number of STIs initiatives

Voluntary national target

Percent increase in the number of DLDD-related education initiatives undertaken by CSOs and STIs, per biennium

%

Which national target your country has established to measure progress in achieving the priorities established in the national action programme, if different from the target suggested above?

National Action Plan does not provide any specific quantitative targets. However Moldova in its capacity of the Convention member, makes the commitment to support, to the extent of its possibilities, CSOs and technical scientific research in issues concerning desertification and mitigation of drought consequences, carried out by national institutions in collaboration with regional and international bodies.

Qualitative assessment

Is your country undertaking initiatives to increase the number of DLDD-related initiatives in the education sector implemented by CSOs and STIs?

Yes

No

Provide a short description of actions taken at the national level to increase the number of DLDD-related initiatives of CSOs and STIs in the field of education.

## Operational objective 1: Advocacy, awareness raising and education

As an example of action taken to increase the number of environmental related initiatives of CSOs in the field of education can be establishing a new structure called the National Council for Participation (CNP). National Participation Council (NPC) is created at the initiative of the Government of Moldova as an advisory body. The Council consists of 30 members, representatives of organized Civil Society Organizations and groups. National Participation Council intends to facilitate involvement of all interested stakeholders in designing, implementing, monitoring, evaluation and updating of strategic planning documents, including environment and education. The Council aims to develop and promote strategic partnership between public authorities, civil society and private sector to strengthen participatory democracy in Moldova, by facilitating stakeholders' communication and participation in identifying and achieving strategic priorities for country development at all stages and by creating the institutional framework and capacities to ensure the full involvement of stakeholders in the decision making process. In order to achieve the established goals, during the NPC mandate were created four working groups, one of which is on Social, Education, Environment and Youth Policies.

As an example of action to increase the number of environmental related initiatives of STIs in the field of education is the organization by the Ministry of Environment the "Ecologic Hour", which is teaching material developed for pre-university education institutions. Each year this initiative reveals a certain environmental topic – biodiversity, water protection, climate changes, sustainable development, combating desertification etc. In April-May 2012 it launched the photo and drawing contest "Environment and Sustainable Development." This contest was started in the context of the UN Conference on Sustainable Development RIO+20 that was held in the period from 15 to 22 June 2012. Students of various pre-university institutions participated in the drawing context, while the photo contest was open to everyone. The contest results have been exhibited in the Ministry's building.

**CONS-0-5** Number of affected country Parties, subregional and regional entities to have finalized the formulation/revision of national, subregional and regional action programmes (NAPs/SRAPs/RAPs) aligned to The Strategy, taking into account biophysical and socio-economic information, national planning and policies, and integration into investment frameworks

**Global target** Percentage of affected country Parties, subregional and regional entities that have formulated/ revised a NAP/SRAP/RAP aligned to The Strategy **≥ 80 %** **2018**

National contribution to the global target

Does your country have a NAP aligned to the Strategy? Yes  No

Qualitative assessment

Is your NAP being implemented? Yes  No

Please answer the following two questions only if your country has not aligned the NAP to the Strategy

Voluntary national target

When do you plan to align your NAP to the Strategy? 2014-2015   
 2016-2017   
 2018-2019   
 No Plan Yet

Which national target your country has established to measure progress in achieving the priorities established in the national action programme, if different from the target suggested above?

Qualitative assessment

Provide any complementary information as needed (e.g., national circumstances affecting the NAP alignment and implementation process)

Aligning National Action Program (NAP) with the UNCCD's 10-Year Strategy and developing Integrated Financing Strategies (IFS) for SLM is now in a process. A NAP aligned to The Strategy is going to be in 2015.

**CONS-O-7**

Number of initiatives for synergistic planning/programming of the three Rio conventions or mechanisms for joint implementation, at all levels

**Global target**

Each affected country Party has either one joint national plan in place or functional mechanism(s) to ensure synergies among the three Rio conventions

2014

**National contribution to the global target**

Was your country implementing joint planning/programming initiatives for the three Rio conventions in the current reporting period?

Yes

Yes, but for only two of the Rio conventions

No

Were there any operational mechanisms that facilitated joint implementation of the three Rio Conventions during the current reporting period?

Yes

Yes, but for only two of the Rio conventions

No

Please answer the following questions if your country does not have such initiatives or mechanisms in place

**Voluntary national target**

Does your country plan to implement joint planning/programming and when?

2014-2015

2016-2017

2018-2019

No Plan Yet

Which national target your country has established to measure progress in achieving the priorities established in the national action programme, if different from the target suggested above?

**Voluntary national target**

Does your country plan to establish operational mechanisms for joint implementation and when?

2014-2015

2016-2017

2018-2019

No Plan Yet

Which national target your country has established to measure progress in achieving the priorities established in the national action programme, if different from the target suggested above?

NGO BIOS

Report on Assessment of Assessments in the Republic of Moldova. [www.thegef.org/gef/sites/thegef.org](http://www.thegef.org/gef/sites/thegef.org)

## Qualitative assessment

Does your country have a monitoring system partially covering DLDD?

Yes No 

Provide any complementary information as needed (e.g., major difficulties experienced, how the system is being supported, etc.):

The Republic of Moldova does not have national monitoring network specifically dedicated to DLDD. Currently Moldova has 2 institutions that carry out monitoring related to DLDD processes on limited sites: Hidrometeorological Service (Ministry of Environment) - and Institute of Soil Science and Agrochemistry (Ministry of Agriculture and Food Industry). For example, the Institute of Soil Science and Agrochemistry performs monitoring of soil quality only in 3 sites, whereas for the comprehensive monitoring of soil degradation (considering the various natural and socioeconomic conditions of Moldova) there are a need to have a network with more than 130 points of observations.

The Republic of Moldova does not have a common national system of environmental information and there is no common information resource, that complicates searching for information as well as complicates working on national action plans, strategies, etc. Coordination and data exchange between agencies responsible for environmental monitoring is irregular and frequently the result of personal initiatives of experts.

In recent years a number of various environmental information systems have been developed in the Republic of Moldova most of which were set up within international projects. However these measures are still insufficient for complying with the requirements of national legislation and international obligations. An integrated environmental monitoring system has not yet been introduced. The environmental monitoring network has recently been expanded that has led to a rapid growth of data

Operational objective 3: Science, technology and knowledge

systems based on different software not compatible one with another. As a result, there is no common national system; the data exchange has become more difficult, the software is outdated, and updating is costly.

Knowledge-sharing systems

List any DLDD-relevant knowledge-sharing system in your country, providing an Internet link and estimated number of users per year (add as many rows as necessary).

**CONS-0-10**

Number of revised NAPs/SRAPs/RAPs reflecting knowledge of DLDD drivers and their interactions, and of the interaction of DLDD with climate change and biodiversity

**Global target**

Percentage of revised NAPs/SRAPs/RAPs that have successfully gone through a quality self-assessment.

≥ 70 %

2018

## CONS-O-13

Number of countries, subregional and regional reporting entities engaged in building capacity to combat DLDD on the basis of the National Capacity Self-Assessment (NCSA) or other methodologies and instruments

## Global target

Percentage of affected country Parties, subregional and regional reporting entities that implement DLDD-specific capacity-building plans or programmes/projects

≥ 90 %

## National contribution to the global target

Is your country implementing DLDD-specific capacity-building plans or programmes/projects on the basis of the NCSA?

Yes No 

Is your country implementing DLDD-specific capacity-building plans or programmes/projects on the basis of other methodologies and instruments to assess national capacity-building needs?

Yes No 

Provide any relevant information on the size, scope, effectiveness and status of the initiatives implemented, or other complementary information as needed

Capacity-building component related to DLDD is quite strong in the environmental projects in Moldova. As example, Moldavian Seed Sector Development in the scope of Climate Change and Disaster Risk Mitigation program (\$475,000). Main areas of coordination are related to improving policies and technical capacity of institutions in the area of seed production integrated with drought and climate risk mitigation.

Moldova Disaster and Climate Risk Reduction Project (\$1,100,000) works on the development of the National DRR framework (elaboration of the National Strategy on Disaster Risk Reduction), raise the capacity of main responsible body (Civil Protection and Emergency Situation Service) and support Local Public Authorities into integration of disaster and climate risk reduction measures into the development plans

## Qualitative assessment

Has your country assessed DLDD-related capacity-building needs?

Yes No 

Did your country receive technical and/or financial assistance to build capacities to combat DLDD?

Yes No 

From which institutions and which type of assistance was provided?

Financial

Technical

UNCCD Secretariat

Global Mechanism

Global Environment Facility

Bilateral agencies

Other multilateral organizations

**CONS-O-14**

Number of affected country Parties, subregional and regional entities whose investment frameworks, established within the integrated financing strategy (IFS) devised by the Global Mechanism (GM) or within other IFSs, reflect leveraging national, bilateral and multilateral resources to combat DLDD

**Global target**

Percentage of affected country Parties, subregional and regional reporting entities that have developed integrated investment frameworks (IIFs)

≥ 50 %

2014

National contribution to the global target

Does your country have an integrated investment framework?

Yes

No

Provide any complementary information as needed (e.g. is the IIF based on the NAP; non-traditional and innovative financing targeted by the IIF; overview of the progress in implementing the IIF in your country; assistance received in the development or implementation of the IIF from the GM or other development partners, etc.)

Sources of information

Ministry of Environment
State of Hydrometeorological Service
NGO BIOS

Please answer the following questions only if your country has not developed an IIF by the end of the reporting period

Voluntary national target

When does your country plan to establish an IIF?

2014-2015

2016-2017

2018-2019

No Plan Yet

Which national target your country has established to measure progress in achieving the priorities established in the national action programme, if different from the target suggested above?

**CONS-O-16**

Degree of adequacy, timeliness and predictability of financial resources made available by developed country Parties to combat DLDD

Rating of the bilateral assistance received for the implementation of the Convention and its Strategy during the reporting period

Adequacy of bilateral assistance received	Adequate	<input type="checkbox"/>
	Fairly adequate	<input type="checkbox"/>
	Not adequate	<input checked="" type="checkbox"/>
<hr/>		
Timeliness of bilateral assistance received	Timely	<input type="checkbox"/>
	Fairly timely	<input type="checkbox"/>
	Not timely	<input checked="" type="checkbox"/>
<hr/>		
Predictability of bilateral assistance received	Predictable	<input type="checkbox"/>
	Fairly predictable	<input type="checkbox"/>
	Not predictable	<input checked="" type="checkbox"/>

Provide any complementary information (e.g., additional information on other aspects beyond those mentioned above which impact proper planning and effective implementation of the Convention in your country, etc.)

Qualitative assessment

Did your country receive assistance in raising resources from bilateral donors?      Yes       No

## CONS-O-18

Amount of financial resources and type of incentives which have enabled access to technology by affected country Parties

## Global target

A steady growth in the financial resources allocated to facilitate access to technology by affected country Parties is recorded along the implementation period of the Strategy

A steady growth in the number of economic and policy incentives reported upon is recorded along the implementation period of the Strategy

National contribution to the target: estimated amount of financial resources allocated to facilitate access to technology

Year	Currency	Amount
2008		
2009		
2010		
2011		
2012	MDL - Moldovan Leu	5149000
2013	MDL - Moldovan Leu	6200000
2014

TNA Project. <a href="http://tech-action.org/">http://tech-action.org/</a>

Voluntary national target

Percentage increase of financial resources allocated to facilitate access to technology by a given year

%

Year

--	--

Which national target your country has established to measure progress in achieving the priorities established in the national action programme, if different from the target suggested above?

There is percentage of financial resources allocated to facilitate access to technology. Concrete actions supporting the realization of the overall targets, including Budget / Resource requirements, is described in the Technology Action Plans (Report III of Technology Needs Assessment Project, Report III, 2012),

Qualitative assessment

Provide any complementary information as needed (e.g., a short overview of specific aspects and the nature of technology transfer in your country, aspects in which there is a need to increase the level of technology transfer, etc.)

The recent and underway policies of the Republic of Moldova are aimed at promoting environmentally friendly activities and technologies in Agriculture, Land and Soil Management, Livestock Production, Biotechnology, Insurance, Irrigation system etc., closely related to DLDD. However, Technology Needs Assessment finalized with specific Action Plan that provide a clear road map to reforming economic incentives and attracting investment in specific technologies to mitigate DLDD threats so far have not developed.

Experts have proposed more than 30 advanced technological options and solutions for the specific conditions of Moldova in the DLDD and related fields. However, lack of mechanisms for the implementation of policy and regulatory environments does not facilitate access of the interested stakeholders to environmental friendly technologies. They use options which focus on a “win-win” approach, when a particular measure is implemented just for increasing current agriculture productivity. This approach does not consider effective medium and long-term perspective for the farming and livestock systems across the various natural and socioeconomic conditions of Moldova, although the economic, energetic and ecologic advantages of advanced practices and techniques are evident. For example, according to long-term field experiments at the Research Institute of Field Crops „Selectia” (Balty, Republic of Moldova) using the conservation tillage technologies lead to the economy of fuel up to 46%.

## Reporting process-related issues

## Financial resources

Could your country count on sufficient financial resources to meet UNCCD reporting obligations?

Yes No 

Provide an estimate of the amount invested from your country's national budget into the current UNCCD reporting process

Year	Currency	Amount
2008		
2009		
2010		
2011		
2012	MDL - Moldovan Leu	0
2013	MDL - Moldovan Leu	0
2014		
2015		
2016		
2017		
2018		

## Human resources

Provide an estimate of the people involved in your country in the UNCCD reporting process, and of the total number of months dedicated by these persons to the reporting process

Year	Number of people	Number of months
2008		
2009		
2010		
2011		
2012	15	2
2013	12	2
2014		
2015		
2016		
2017		
2018		

## Knowledge

Could your country count on sufficient technical and scientific knowledge to meet UNCCD reporting obligations?

Yes No 

## Coordination

Was coordination at the national level with the relevant line ministries satisfactory in order to report comprehensively and coherently?

Yes No 

## Participation and consultation

Was a participatory or consultative approach applied to involve all relevant stakeholders in the reporting process?

Yes No 

## Validation

Was a validation meeting held as a part of the reporting process?

Yes No 

## Subregional and regional processes

Did your country cooperate with the entities entrusted with preparing the subregional and regional action programme reports?

Yes No

Accommodation of specific requests within decisions taken by the Conference of the Parties

Reporting on specific COP requests: iterative process on indicators

Tick the boxes only if you have experienced difficulties in reporting on one or more performance indicator(s). When doing so, place the tick mark under the e-SMART criterion for which the difficulty occurred.
